

NOTICE: Napoleon Avenue Marine Terminal Port Modernization Fee

A Modernization Fee of \$25.00 per container will go into effect on Monday, May 3, 2021

Dear Valued Customer,

To those stakeholders who visit Napoleon Avenue Marine Terminal on a regular basis, it should be evident that work to modernize the facility has started in earnest.

In addition to Port NOLA's significant investment, Ports America, as a long term partner, is committed to further developing this strategic gateway into a best-in-class terminal. The ability to serve some of the largest container vessels in the industry via state of the art cranes, supported by increased land side storage capacity, will ensure Napoleon Ave Marine Terminal remains an attractive gateway for the industry while fostering future growth opportunities.

Interwoven physical and technological infrastructure will be essential to meet expanding requirements of the international shipping and supply chain. The purpose of the Napoleon Avenue Marine Terminal Port Modernization Fee ("PMF") going into effect on May 3, 2021 is to support these critical infrastructure and technology projects and to facilitate the ongoing maintenance and repair necessary for the safe and efficient operation of the terminal. Projects supported by the PMF may include projects such as the following:

- Concrete rehabilitation efforts throughout the terminal, which would greatly improve the overall functionality of the facility
- Improving visibility and integration through the implementation of technology, such as PA Connect, which would enable transportation management systems (TMS) and warehouse management systems (WMS) to be linked to terminal transactions via API for improved supply chain efficiencies
- Upgraded optical character recognition (OCR) cameras, enhanced mobile applications, and improvements to the terminal operating system (TOS) portal
- Taking advantage of 5G networks to increase connectivity of multiple technology tools throughout the terminal to improve data flow through our various outward facing interfaces.

Following the implementation of the PMF, in the event of adverse weather-related terminal closures, Ports America will make every effort to offer additional gate days/hours at no additional cost.

The full revised tariff, as well as appointment and PMF payment instructions, may be found on our Ports America Louisiana's website – <http://www.portsamericaLouisiana.com>.

Thank you for your continued support.

Ports America
