

Attention

New Version of Web Express

Please be advised that Ports America upgraded the Terminal Operating system (EXPRESS) to a Higher Version.

The majority of the applications and use will remain the same. Some of the Forms may have a few added Fields that will not cause any negative impact to the daily users.

If you have not already installed the newest version of JInitiator, please do so now by [clicking here](#).

*Please note that a member of your IT department may have to install this for you.

Firewall

The 2.9 version of Express requires a different port for communication to the server. Depending on your firewall configuration, your IT department may have to allow access to the following destination via the following port:

Destination: dmtforms2.portsamerica.com (65.196.71.54)
Port: TCP 80, 7778, and 9000 open

IE Crash Fix

Rename C:\Program Files\Oracle\JInitiator 1.3.1.30\bin\hotspot\JVM.dll to JVM.old.

Copy [this new file](#) to the same directory.
